Professional Summary

Computer Science graduate with 3 years of professional experience as a Systems Analyst, transitioning into full-stack development with a frontend focus. Proficient in React.js, JavaScript, Tailwind CSS, and Node.js, with hands-on experience building responsive, component-driven interfaces and integrating RESTful APIs. Experienced in integrating AI APIs into production applications, having built ResumeIQ using the Google Gemini 2.5 API with custom prompt engineering to deliver a complete, shipped feature end-to-end. Built and deployed KicksLab, a full-stack e-commerce platform with a live React frontend optimised for performance across large datasets. Strong analytical background brings structured problem-solving, attention to detail, and a genuine passion for building intuitive, high-quality user experiences

Skills

Front-end

React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, TypeScript, Next.js (learning)

Back-end

JavaScript(Node.js), Python, Express, Java, ASP.NET, PHP

Databases

MongoDB, Mongoose, PostgreSQL, MySQL, Oracle, SQL Server, SQL

Cloud & DevOps

Vercel CI/CD, Git, GitHub

GenAI & AI Tools

Google Gemini API, Prompt Engineering, ChatGPT, Claude

Tools

Postman, VS Code, Android Studio, PyCharm

UI/UX Design Tools

Figma, Adobe XD

Microsoft Ecosystem

Microsoft 365, SharePoint, Outlook, Excel, Word, Teams, Power Platform (familiar)

Professional Experience

Systems Analyst

Alleguard Inc, Toronto, Canada

July 2022- October 2025

- Configured and maintained software-enabled machine control systems for production lines, ensuring precise system integrity during new product deployments within live manufacturing environments.

- Monitored and analysed real-time system data across production environments, identifying anomalies and performance deviations before they impacted operations
- Executed comprehensive end-to-end system validation, debugging, and performance tuning on operational manufacturing infrastructure to guarantee zero-downtime production cycles.
- Collaborated with cross-functional teams, including engineering, operations, and software, to communicate findings, report on system health, and drive resolution of technical issues.
- Followed established configuration processes and documented procedures precisely, ensuring consistent and accurate system behaviour across all production releases.

Projects

ResumeIQ (AI resume analyser) [Live demo](#)

- Shipped a complete AI-integrated feature end-to-end from UI design to backend prompt engineering to production deployment, demonstrating full ownership of a product feature.
- Designed a clean, intuitive React.js frontend with Tailwind CSS, where users can upload a resume and paste a JD to receive structured AI feedback instantly.
- Engineered the Express.js backend to handle document parsing, prompt construction, and Gemini API communication, returning structured JSON responses rendered dynamically on the frontend.
- Actively expanding functionality: adding scoring breakdowns by category, keyword gap analysis, and rewrite suggestions.

KicksLab (Frontend Deployed) [Live demo](#)

- Built a reusable, shared component library for UI elements: product cards, cart, auth forms, and navigation, ensuring consistent design and behaviour across the entire application.
- Implemented a pixel-perfect, component-driven UI architecture using React.js and Tailwind CSS, optimised for seamless cross-browser compatibility and responsiveness across mobile and desktop viewports.
- Architecting a RESTful API with Node.js, Express, and MongoDB to facilitate product management, order processing, and payment gateway integration.
- Applying industry-standard performance best practices, including lazy loading, component splitting, and efficient state management for optimised speed.

ThinkBoard (MERN Stack Web Application)

- Built a full-stack note-taking application using MongoDB, Express.js, React.js, and Node.js.
- Implemented RESTful APIs to perform CRUD operations (create, read, update, delete) on notes.
- Designed a responsive and modern user interface using Tailwind CSS.

Education

Computer Software and Database Development

Lambton College Toronto, Canada

September 2020 - July 2022

Bachelor's in Computer Application

Kristu Jayanti College Bangalore, India

April 2016 - December 2019
